

Date: 10/03/2022  
Lab Session No.: 04

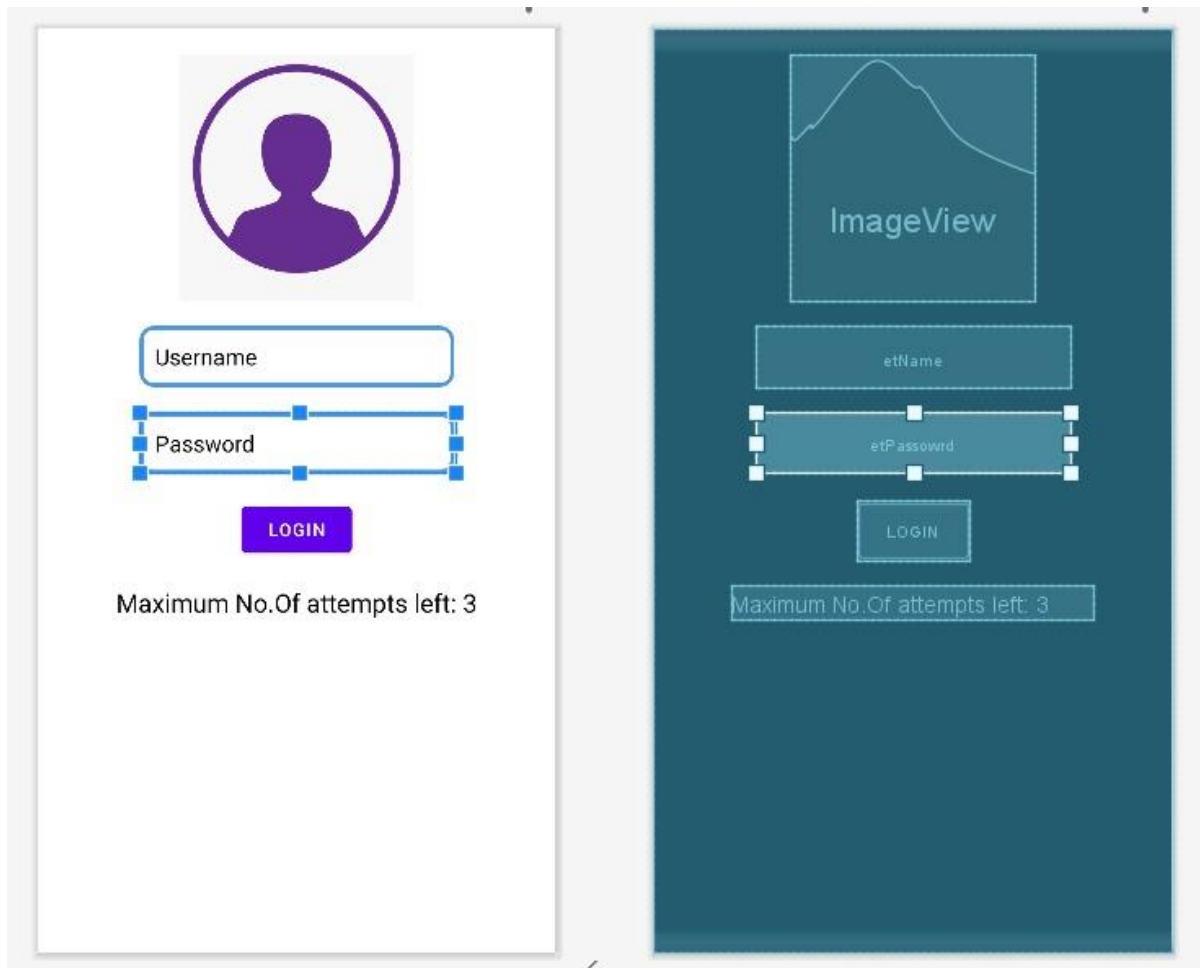

**Aim:**

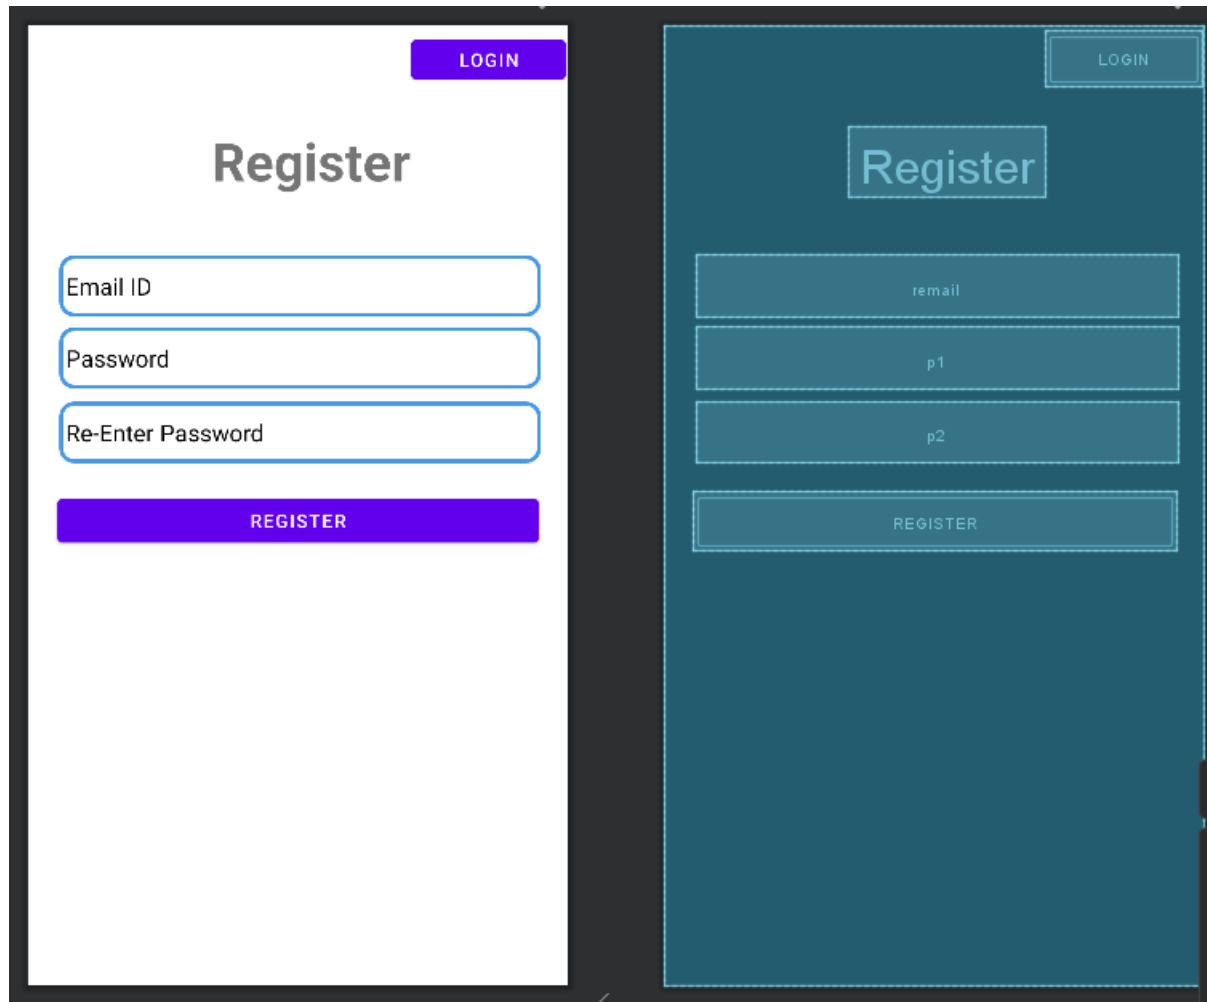

Develop an android application to implement login and registration screen

**Software's /IDE Tools:**

Android Development Kit / Android Studio

**Application User interface design:**

### Application Programming Interface:

API / PACKAGES	CLASSES / INTERFACES	METHODS	DESCRIPTION
import androidx.appcompat. AppCompatActivity;	AppCompatActivity	protected void onCreate(Bundle savedInstanceState)	onCreate(Bundle) is where you initialize your activity. When Activity is started and application is not loaded, then both onCreate() methods will be called.
import android.widget. EditText;	EditText	getText()	Determines the minimum type that getText() will return. If set, specifies that this TextView has a textual input method and should automatically capitalize what the user types.

**Code/Implementation:**

// Develop an android application to demonstrate the Implicit and Explicit Intent.

// Project Name : ShareMyApp

Lab Session No.	: 04
Author	: Tellakula Avinash
Date	: 10/03/2022
Roll Number	: 198W1A05C0
Description	: login and registration page
Softwares required	: Android Studio
Topics Covered	: Implement login and registration page

\*/

**LOGIN PAGE:****main activity.java**

```
package com.avinash.loginform;
import androidx.appcompat.app.AppCompatActivity;
import android.content.Intent;
import android.os.Bundle;
import android.view.View;
import android.widget.Button;
import android.widget.EditText;
import android.widget.TextView;
public class MainActivity extends AppCompatActivity {
    EditText name,password;
    Button login;
    TextView info;
    int counter=3;
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        name=(EditText)findViewById(R.id.etName);
        password=(EditText)findViewById(R.id.etPassowrd);
        info=(TextView)findViewById(R.id.attempts);
        login=(Button)findViewById(R.id.login);
        info.setText("No. of Remaining Attempts : 3");
        login.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View v) {
                validate(name.getText().toString(),password.getText().toString());
            }
        })
    }
}
```

```

    });
}
public void validate(String name, String password) {
    if(name.equals("Admin") && password.equals("123#")){
        Intent intent=new Intent(MainActivity.this,secondActivity.class);
        startActivity(intent);
    }
    else{
        counter--;
        info.setText("No. of Remaining Attempts : "+counter);
        if(counter==0){
            login.setEnabled(false);
        }
    }
}
}
}

```
